

Technical Bulletin #105

AQUA BLUE PCN #P7

Aqua Blue is an amazing acidic cleaner, conditioner and scratch remover for use with most aqueous and CtP metal plates. Leading plate manufacturers such as Kodak, IBF and Fujifilm tested Aqua Blue and confirmed it works well with their thermal plates. Use **Aqua Blue** for “on-the-fly” cleaning. It will make your printing look better while extending plate life.

FEATURES

- Removes ink and scratches and can be used “on- the-fly”.
- Makes the image area more ink receptive and sharpens halftones.
- Compatible with a wide range of metal plates, including thermal.
- Packaged 12 quarts/case

BENEFITS

- Minimizes downtime; increases productivity & plate life. Saves money.
- Improves print quality.
- Saves money!
- Convenient, easy to use bottles

DIRECTIONS: SHAKE WELL! Apply to entire plate with dampened sponge or cloth. Apply liberally. Rinse with clean water or with fountain solution mixture and resume printing. Repeat where necessary.

DIRECTIONS FOR ON-THE-FLY CLEANING: Spray directly on plate while press is running to remove piling, plugging and scum.
