

TECHNICAL BULLETIN #103

BURNISHINE CHROME ROLLER CLEANER/DESENSITIZER PCN #3462Q

Printers using Burnishine's **Chrome Roller Cleaner/Desensitizer** claim it is one of the best they've ever used! It saves a tremendous amount of time in press clean up and maintenance. **CRC** will stop ink buildup, stains and other contaminants from adhering to chrome impression cylinders, metering rollers, transfer cylinders and bearers. **Chrome Roller Cleaner** is used and endorsed by major press manufacturers.

FEATURES

- Increases dampening control
- Cleans, protects and desensitizes.
- Great time saver!

BENEFITS

Keeps water train clean. Press runs at peak performance.

Ink doesn't stick. Makes chrome hydrophilic (receptive to water - repels ink). Stops oxidation and corrosion. Extends the life of chrome parts.

Cuts clean-up time in half. Makes ink changes and press clean-up a breeze. One step product – wipe on and leave on!

Directions: Start with a clean press. Apply **Chrome Roller Cleaner**. **Just wipe on and leave on!** The protective coating will not contaminate the ink or fountain solution. To clean up simply wipe down the cylinders at the end of the day – no more scraping! Reapply after cleaning.
