# PLATE CARE

## PCN #3600 - Finisher Cleaner Preserver

**Plate Care** is a mildly acidic FCP product that is compatible with **all** metal plates – including **CtP Thermal and violet**. It is a one-step product that thoroughly cleans and finishes the plate surface. It protects against oxidation and may be used to clean plates on press. Removing **Plate Care** is simple – just wipe the plate with a damp sponge or soft cloth!

<u>FEATURES</u>	<u>BENEFITS</u>
• Cleans, finishes and preserves all	Saves money – no need to stock additional Cleaners or gums.
• Easily removed with water	Plates rolls up faster; saves time
• Tested and approved by leading Plate manufacturers	Assurance of product compatibility and performance
• Low VOC's	Safe for printers and the environment
• Mild Ph	Safe for use all all metal plates – even thermal and violet
• Economically priced	Saves money over comparable cleaners

**Directions: Shake before using!** Apply evenly to entire plate using a cotton pad, cloth, or damp sponge. Buff dry and store. **Plate Care** will protect plates up to a year when stored properly. To remove, simply wipe the plate down with a damp sponge or cotton pad.
