PLATE SAV-UR

PCN #P1, P2, P4, P5

Plate Sav-Ur is a one step alkaline cleaner, conditioner and scratch remover for most analog metal plates. When used as directed, **Plate Sav-Ur** thoroughly cleans the plate surface and makes plates more ink receptive. It is an excellent restarter of standing metal plates and can be used to deglaze dampening systems.

FEATURES

- Scratch Remover & Desensitizer
- Excellent Cleaner
- Restarts standing plates
- Environmentally Friendly

BENEFITS

Actually makes scratch marks disappear. Keeps non-image area ink free. Improves print quality while prolonging life of the plate.

Removes scum, gum streaks and oxidation.

Time and money saver!

VOC % -- Less than 1%. Safe to use and store. Nonflammable and biodegradable

Directions for plate cleaning: Moisten a cotton pad with **Plate Sav-Ur** and apply to plate.

Note: Do not allow product to dry on plate. Rinse with fountain solution or water. Repeat as needed. May be used on the fly.

Directions for deglazing dampener: Once a week put a capful of **Plate Sav-Ur** in the dampener. Run the press for about 10 minutes and rinse with hot water. Follow up with roller or blanket wash.
