

CLEANERS / ACTIVATORS -CLEANERS-

CLEANER - ACTIVATOR FOR THERMAL POSITIVE OFFSET PLATES.

PROPERTIES

- ▶ Completely eliminates any oxidation that may form on the plate permitting continued printing without problems.
- ▶ Degreaser - oxide remover.
- ▶ Reactivates the graphic image and regenerates the hydrophilic surface of the plate.
- ▶ A specific formulation for thermal plates, giving a complete and fast removal of ink residues.

APPLICATION

- ▶ Like all cleaners, use only when you have verified problems with scumming due to oxidation.

METHOD OF USE

- ▶ Shake well before applying to the plate and remove completely with water before resuming the run so as not to damage the blanket rolls.

CONSIDERATIONS

- ▶ Use modestly and with care, it could cause loss or reduction of the screen dot, or cause early wear of the anodic layer.
